

Alan Liu

Crisis and Security Director of Greater China and SEAQ, of Kering Group

Alan Liu is a seasoned professional in corporate security, compliance, and risk management, with a robust portfolio of certifications and international experience, making him a strong candidate for the Board of Directors of TAPA Asia Pacific. His expertise spans corporate security, compliance, crisis management, business continuity, supply chain security, and brand protection. Alan holds multiple certifications, including CIPM, CFA ESG, LLM, TCE, CISA, CDPSE, CBCP, and CIPP/E, underscoring his comprehensive knowledge in these domains. He has contributed thought leadership through publications, such as an article in ASIS International's Security Management magazine, where he shared insights on travel security, executive protection, and kidnapping response strategies.

In his role as the China Office Official Representative of TAPA APAC, Alan Liu has played a pivotal role in expanding the association's presence and influence in the region. He was instrumental in the establishment of the TAPA APAC China Office in Pudong, Shanghai, underscoring the association's commitment to developing and promoting global standards for supply chain resilience and sustainability. Alan's efforts have facilitated greater collaboration between TAPA APAC and Chinese governmental bodies, as evidenced by his participation in the SCRS Conference 2024, where he joined other dignitaries in the opening ceremony, symbolizing the launch of the conference and the association's initiatives in China.

Dr. Amarpreet Singh

GDBA, CPP®, PMP®, CFE®, TAPA TSR/FSR Auditor
Country Security Manager, of
India | Johnson Matthey

Dr. Amarpreet Singh is a seasoned security and risk management leader with over 20 years of experience spanning manufacturing, logistics, e-commerce, and critical infrastructure. Currently serving as the Country Security Manager for Johnson Matthey India, he brings a strategic, future-ready approach to physical security, risk governance, and business continuity.

He has successfully led the rollout of TAPA FSR and TSR standards across India operations and is a certified TAPA auditor since 2021. A contributing member of ASIS Mumbai Chapter, Dr. Singh is actively involved in working groups on supply chain resilience, insider threat mitigation, and emerging risk landscapes.

His core strengths include BCP design, crisis management, brand protection, and anti-counterfeiting strategy aligned with global compliance, operational excellence, and stakeholder engagement. A believer in security as a business enabler, he drives innovation and resilience in complex, high-risk environments.

Credentials: Global Doctorate in Business Administration (SSBM), CPP®, PMP®, CFE®, LLB, Post Graduate in Criminology & Police Administration.

Chandrasegaran Marappen (Chandra)

Security Manager, of
Dexcom

Daniel Shao

Senior Security Program Manager, of
Microsoft

As Senior Security Program Manager at Microsoft, Daniel leads the Devices supply chain security program across Asia. With over 18 years of experience in security leadership roles at global multinational corporations, he brings deep expertise in end-to-end security operations. His background spans supply chain security, physical security, security systems, asset protection, event security, risk assessment, loss prevention, crisis management, and investigations. Daniel offers the Board a strategic perspective on physical security in the high-tech sector, grounded in both operational excellence and regional insight.

Daniel plays a vital role in the TAPA Asia Pacific (APAC) China Representative Office, where he contributes significantly to strengthening regional engagement and implementing TAPA's global standards locally. As part of the China Representation Office team, he has been instrumental in coordinating with Chinese industry stakeholders to raise awareness of supply chain security risks and promote the adoption of TAPA's Facility Security Requirements (FSR) and Trucking Security Requirements (TSR). His efforts support TAPA APAC's mission to enhance the security and resilience of supply chains across China.

Daniel's contributions also include facilitating outreach programs and training workshops that bridge the gap between local logistics providers and international security expectations. Through these initiatives, he has helped to localize TAPA standards for better applicability within the Chinese market, while also reinforcing the association's strategic presence in the region. His work within the TAPA APAC China Representative Office demonstrates a strong commitment to aligning domestic practices with global benchmarks in supply chain security and risk mitigation.

Felix Li

Director of Safety and Security Services, of
Starbucks

Felix Li is a seasoned security and risk management expert with over 25 years of experience spanning the supply chain, high-tech, automotive, and food and beverage sectors. Since 2018, he has led the Safety & Security Services function at Starbucks China, overseeing risk management and security operations across the China market. His deep expertise in security, safety, and crisis management gives him a well-rounded perspective from both buyer and vendor standpoints.

As a long-standing member of the Transported Asset Protection Association (TAPA) since 2002, Felix currently serves on the Board of TAPA Asia Pacific (APAC), where he plays a key role in strategic planning and guiding regional initiatives. He has been a driving force in advancing TAPA standards, leading training efforts across multiple countries, including the first Chinese-language session in China. Felix also supported the expansion of the Train-the-Trainer (TTT) program and contributed to the development of new training frameworks as part of the Training Committee during his last board term.

Felix has been instrumental in promoting supply chain resilience and sustainability through his thought leadership and public engagement. At the 2024 Supply Chain Resilience and Sustainability Conference in Shanghai, he moderated a panel on mitigating risks in geopolitically volatile environments. Emphasizing ESG, risk indicators, and best practices, Felix highlighted TAPA's critical role in equipping members with tools and standards to build robust, sustainable supply chains in an increasingly complex global landscape.

Fred Kong

APJC Supply Chain Security Leads, of
Dell Inc.

Fred Kong is a distinguished expert in supply chain security, with over 20 years of experience driving the protection and integrity of global logistics operations. As the Asia Pacific Japan (APJ) Lead for Global Supply Chain Security at Dell Technologies, he plays a critical role in designing and executing robust security strategies across Dell's regional supply chain. His core competencies span physical security, risk mitigation, and the implementation of global security standards, ensuring end-to-end resilience in a complex and fast-evolving threat landscape.

At Dell, Fred has been a driving force behind the adoption and integration of Transported Asset Protection Association (TAPA) standards, including Facility Security Requirements (FSR) and Trucking Security Requirements (TSR). His leadership has been central to achieving TAPA certifications for multiple Dell sites across the region, reinforcing the company's commitment to stringent security protocols. These initiatives have not only enhanced Dell's internal security posture but have also set high benchmarks for industry-wide supply chain protection practices.

Beyond his corporate role, Fred actively engages with the wider security community through his involvement with TAPA Asia Pacific (APAC). He has been a key participant in regional conferences and initiatives focused on elevating supply chain resilience and security. Notably, Fred contributed as a speaker at the 2023 Supply Chain Resilience and Sustainability (SCRS) Conference, sharing valuable insights on navigating risks in complex logistics ecosystems. His ongoing contributions highlight a steadfast commitment to fostering collaboration and innovation in securing global supply chains.

Jason Le Busque

Global Head of Protection Security, of
Toll Group

Jason Le Busque is a dedicated professional with a passion for protective security, business resilience, investigations, and safety. With extensive experience in both Commercial and Government sectors, he excels in physical and technical security within logistics, transport, warehousing, and government sectors.

His global operational experience spans Asia, Europe, Americas, Africa, and the Middle East, reflecting his commitment to ensuring safety and security worldwide. Jason leads the working Group for TIS in TAPA APAC and is an active member of the TAPA community strongly advocating TAPA in Toll and across the wider logistics and transport industry.

Accomplished security and resilience executive with over 25 years of experience across government and commercial sectors. Proven expertise in global protective security, investigations, crisis management, and enterprise resilience. Recognized for strategic leadership, operational excellence, and the ability to embed security culture across complex, multinational organizations. Extensive global exposure across Asia, Europe, the Americas, Africa, and the Middle East.

Currently leading Toll Group's global security function, driving enterprise-wide initiatives in physical security, investigations, crisis and continuity management, and regulatory compliance. A trusted advisor to executive leadership and board-level stakeholders, with a strong network across law enforcement, defence, and emergency services.

Julian Tan

Global Head of Physical Security Ops, of
DYSON Operations Pte Ltd

Julian Tan is a veteran in security and risk governance with over 20 years of global experience spanning physical security, risk mitigation, and crisis response. He currently serves as the Global Head of Physical Security Operations at Dyson Operations Pte Ltd, where he has been instrumental in designing and executing enterprise-level security strategies. His forward-thinking approach has strengthened Dyson's resilience across markets, with a strong emphasis on aligning global operations with evolving risk landscapes.

Elected to the Board of Directors of TAPA Asia Pacific (APAC) in 2024 as Secretary, Julian plays a central role in shaping the association's strategic direction and governance. He brings a wealth of operational insight and leadership to the board, contributing to initiatives that enhance supply chain protection and regional security collaboration. His cross-sector experience supports the organization's mission to elevate standards and drive consistent adoption of risk-based frameworks across Asia Pacific.

Julian has been a strong advocate for the full integration of TAPA's security standards—including FSR, TSR, GSR, and the newly launched Cyber Security Standard (CSS) 2025—within Dyson's global security operations. Under his leadership, Dyson became one of the first multinational organizations to adopt TAPA's full standards ecosystem enterprise-wide, embedding it across multiple geographies and functions. He has also actively supported the development of new training programs and standard implementation toolkits, helping TAPA members and industry peers strengthen compliance, resilience, and operational continuity in increasingly complex environments.

Keven Liang

APAC Regional Supply Chain Security Manager, of
Hewlett-Packard (HP) Singapore

Keven Liang is a seasoned expert in supply chain security, risk management, and brand protection, with over 17 years of experience spanning across Asia Pacific. He currently serves as the APAC Regional Supply Chain Security Manager at Hewlett-Packard (HP) Singapore, where he leads critical initiatives focused on manufacturer compliance, supplier assessments, logistics audits, and sustainability within HP's supply chain ecosystem.

Keven is widely recognized for his strategic foresight and operational excellence in securing complex supply chain networks. His leadership has been instrumental in reinforcing HP's brand protection strategy and ensuring supply chain integrity through the implementation of robust risk mitigation frameworks.

Before joining HP Singapore, Keven played a key role at DHL Express China, where he successfully led the development and execution of sustainability and compliance programs across multiple service sites. His contributions included preparing facilities for TAPA (Transported Asset Protection Association) certifications and ensuring alignment with international security standards.

A strong advocate for industry collaboration, Keven served as a Board Member of TAPA Asia Pacific from 2017 to 2021, during which he held leadership roles including Vice Chairman and Treasurer. His tenure was marked by significant advancements in the promotion and adoption of TAPA's Facility Security Requirements (FSR) and Trucking Security Requirements (TSR), especially in the Greater China region. Currently, Keven continues to support TAPA APAC's mission through active participation in the China Representative Office, facilitating cooperation between multinational corporations and regional stakeholders. He is also a frequent speaker at industry conferences and TAPA-led webinars, where he shares thought leadership on intermodal transport risks and the application of emerging technologies in supply chain security.

Keven's ongoing commitment to excellence and innovation makes him a respected leader in the field of supply chain resilience and a valued contributor to regional and global security standards development.

Satpinder Singh Kundlas

Regional Security Director, AMEA, of
Mondelez International

Satpinder Singh Kundlas is a distinguished security professional with extensive experience in managing corporate security, risk assessment, and crisis response across the Asia, Middle East, and Africa (AMEA) region. As the Regional Security Director at Mondelez International, Satpinder plays a pivotal role in safeguarding the company's assets, employees, and operations in a diverse and dynamic market. In his current role, Satpinder oversees a dedicated team of security experts, implementing comprehensive security strategies and protocols tailored to the unique challenges of the AMEA region. His leadership has significantly enhanced the company's security measures, effectively mitigating risks and ensuring seamless business operations. Prior to joining Mondelez, Satpinder held key security and risk management positions in several leading multinational corporations. His strategic insights and meticulous approach have been instrumental in establishing robust security frameworks and crisis response plans. Satpinder has been recognized for his outstanding leadership and innovative solutions in security management. His ability to handle complex security challenges has earned him numerous accolades and respect from industry peers and stakeholders.

Satpinder holds a degree in science from Punjab University Chandigarh, supplemented by specialized training in security management including TAPA FSR Authorised Auditor and crisis response from prestigious institutions. He is certified Crisis Business Continuity Professional Management. Emerging leader program of Mondelez International. Known for his integrity, strategic vision, and proactive approach, Satpinder is committed to fostering a culture of security awareness within the organization. His foresight in anticipating potential threats and implementing effective countermeasures has been crucial to his success in the security domain. Satpinder is an active member of several professional security associations, contributing to the advancement of security practices and knowledge sharing within the industry. Satpinder Singh Kundlas dedication to excellence in security management makes him a valuable contributor to the security fraternity. His strategic vision and leadership continue to drive security initiatives, ensuring a safe and secure environment for all stakeholders in the AMEA region.

Tony Lugg

Managing Director, of
DPH Holdings Inc Pte. Ltd

Tony Lugg is a globally respected leader in supply chain security and risk management, with over 30 years of professional experience across Asia Pacific, Europe, the Middle East, and Latin America. His diverse background spans law enforcement, electronic and aviation security, and executive roles in the automotive sector, including Director of Logistics Purchasing and Centre of Excellence at Lear Corporation Asia Pacific. For more than 18 years, Tony has been deeply involved with the Transported Asset Protection Association (TAPA), serving in multiple senior leadership roles, including his current position as Chairman of TAPA Asia Pacific (APAC), where he continues to drive regional and global impact.

Under Tony's leadership, TAPA APAC has significantly expanded its strategic scope and influence. He spearheaded the introduction of several pioneering initiatives, including the Cyber Security Standard (CSS) 2025 to protect critical logistics infrastructure from digital threats, and championed the use of the TAPA Intelligence System (TIS) to combat counterfeiting and cargo theft. In response to growing operational complexity and risk, Tony also oversaw the launch of TAPA's Risk Assessment Standard and Business Continuity Planning (BCP) Standard—two critical frameworks that help organizations proactively manage risks and maintain operational continuity during crises. These initiatives have cemented TAPA APAC's position as a thought leader and solutions provider in a rapidly evolving security landscape. His efforts earned industry recognition, such as the Dell Technologies Partner Excellence Award, for advancing supply chain resilience.

At the global level, Tony plays a key role on both the TAPA Worldwide Council and the TAPA Change Control Board. Through these platforms, he contributes to the ongoing development, harmonization, and modernization of TAPA's global standards—including FSR, TSR, PSR, CSS, Risk Assessment, and BCP—ensuring they remain robust, relevant, and responsive to emerging threats. His governance contributions are critical to shaping TAPA's long-term strategy and aligning regional efforts with global security priorities. Through his continued leadership and collaboration with industry and government stakeholders, Tony remains at the forefront of building secure, sustainable, and resilient global supply chains.
